

DM7V Cassettes

Optimize your cash-handling infrastructure through modularity, security, and flexibility

DN Series® is built on a modular platform. At the heart of DM7V and RM4V lies a unified technology architecture that bridges the functional divide between ATMs and teller systems. This convergence is built on a shared cassette infrastructure, using vertically oriented "V" cassettes across both cash dispensers and cash recyclers.

The DM7V cassette platform offers a range of fully interchangeable cassettes that are built to support your withdrawal functionality across global ATM deployments. Whether it's handling large volumes, mixed denominations, or maximizing security, the DM7V cassette family is engineered to adapt to any financial institution's requirements without hardware modifications.

More Personalized

Tailor cash dispensing to each deployment scenario with configurable denomination mixes and interchangeable formats. Enable customer-centric services while optimizing back-end operations.

More Efficient

Provides the highest volume storage for the most frequently used denominations, thereby extending replenishment cycles and reducing CIT service costs.

More Available

Equipped with our advanced friction pick technology and connected to the DN AllConnect™ Data Engine, the DM7V technology provides high reliability.

More Secure

From physical tamper-proofing to logical encryption, every DM7V cassette type supports a layered approach to securing your cash cycle from attack or fraud.

More Future-Ready

Modular, upgradeable and multi-denomination ready: DM7V cassettes adapt to regulatory shifts, new currencies, and evolving operational requirements.

More Sustainable

Built for a greener future: DN Series® minimizes power use, reduces service and CiT trips, and optimizes resources—supporting your sustainability goals at every step.

More Integrated

The DM7V cassettes are easily interchangeable; simply remove one and insert the other.

Specifications

- Modular design enables full interchangeability across the DM7V and RM4V platform
- Supports up to 8 denominations in DM7V (depending on cassette and system type)
- Adjustable guiderails allow for quick adaptation to new denomination

Security

- Same secure safe & note transport design
- Trusted device communication
- Ink ready
- Lockable cassettes
- Seal ability included
- Feed out blocker

Reliability

- Advanced friction picking technology minimizes picking errors
- DN AllConnect ServicesSM
- DN designed & developed, IP-owned

System Availability

- Cash Cassettes - Available for all DM7V and RM4V installations.
- Reject/Retract Cassettes - Available for all DM7V installations.
