

# Dispensing Module - DM7V

## Cross-Platform Media Engine

The DM7V delivers the most adaptable, high-capacity dispensing performance available across the DN Series® family. With decades of expertise and continuous innovation in self-service technology, the DM7V is designed and manufactured under fully owned IP with complete control of the hardware, firmware, and software.

The DM7V ensures unmatched reliability, security, and lifecycle support. Its compact non-split architecture reduces service time and increases system uptime, while its shared cassette platform with our RM4V recycler platform enables flexible media management and simplified platform management for financial institutions worldwide.

### More Personalized

The smoother note presentation, reduced noise output, and improved visual guidance contribute to a more reassuring and satisfying end-user experience, supporting your customer retention and brand trust.

### More Efficient

Compact, non-split architecture simplifies service access, reduces servicing time, and optimizes system footprint needs.

### More Integrated

It brings operational consistency, easier certification, and simplified fleet management due to common hardware components and platform software.

### More Sustainable

The DM7V minimizes power use, reduces service and CIT trips, and optimizes resources - supporting your sustainability goals at every step.

### More Future-Ready

The ability to handle up to eight denominations or multiple currencies in a compact footprint allows banks to serve diverse customer segments with a single module type.

### More Available

Engineered with advanced friction pick technology to accommodate all types and quality of notes and media, and paired with DN AllConnect Services™ Architecture the DM7V ensures that self-service devices remain operational longer and deliver higher ROI.

### More Secure

Layered security features protect against traditional and emerging physical, data and cyber threats.

**Shuttle Interface**

- Up to 60 note bundle per transaction
- Up to 6 notes per second processing speed
- Ergonomic and illuminated cash shuttle for easy user guidance and operation.

**Cassette Detail**

- Standard Dispensing cassette: 420mm note stacking capacity per cassette
- Dual Dispensing cassette: 195mm and 139mm note stacking capacity for dispensing in one cassette
- Dispense 3 denominations, or up to 6 with dual cassettes in the standard version.
- Dispense 4 denominations, or up to 8 with dual cassettes in the high capacity version
- Vertical cassette design simplifies cash-in-transit (CIT) and first line handling by allowing easy removal while standing

**Reliability**

- Paired with DN AllConnect Services<sup>SM</sup> architecture for proactive monitoring and performance optimization
- Long-edge note handling technology enhances reliability and minimizes note jams or mispicks

**IP Ownership**

- DN designed & developed enabling greater control & faster deployment of currency templates

**Security**

- Trusted Device Communication
- Anti-cash trapping shutter
- AI enabled TILT Dispense Management to deter and minimize jackpotting loss
